

All V-Spec springs are manufactured and designed in Japan by leading GT Class racing spring manufacturers. The innovative oval coiling with special spring rates deliver a better ride, handling and noise damping.

The V-Spec coil-overs feature a dual function spring cap which acts as a spring stabilizer and bump stop. V-Spec uses a locking screw design for a safer and more secure fit eliminating cheap rubber gaskets used by other manufacturers.

Special dual locking perches are used for a higher weight capacity, reducing the chance that the spring perch might slip. It also provides for a faster and easier height adjustments. Steel washers are used to prevent adapters from damaging or cracking due to extreme road conditions.

### Application Guide

Make	Model	Year	Part #	Cost
Acura . . . . .	Integra . . . . .	90-93 . . . . .	IN9093 . . . . .	\$200.00
